

MS Access Theory Paper

Sl no.	Question	A	B	C	D	Ans
1	Which is the extension of Access 2007	.mdb	.accdb	.doc	None of these	B
2	Which is the DBMS program in the following examples	FoxPro	My SQL	Access	All of the above	D
3	What is the actual size of Yes/No Datatype ?	1 Bit	1 Byte	1Character	1 GB	A
4	Report is ain access.	Relationship	Query	Datatype	Object	D
5	The number of Primary key in a Table of Access	4	3	2	1	D
6	If we want to write our address in Access , then we have to chose	Text Datatype	Number Datatype	Memo Datatype	Auto Number Datatype	A
7	In which datatype if we enter data at once, then it is not changeable	Text	Auto Number	Memo	Currency	B
8	Which field type will you select if you need to enter long text in that field?	Text	Number	Memo	Ole Object	C
9	The expression builder is an access tool that controls an expression___ for entering an expression	Table	Box	Cell	Palate	B
10	Which of the following is not a type of MS Access database object?	Table	Form	Worksheet	Modules	C
11	In which method we don't need to specify the field type and size while creating a new Table?	Design View	While Using Wizard	Creating table by entering data	All of the above	C
12	The size of a field with number data type can not be _____	2	4	8	16	D
13	Which of the following option creates a Drop Down List of values ?	Ole Object	Hyperlink	Memo	Lookup Wizard	D
14	what can be the maximum length of a text field ?	120	255	265	75	B
15	Which kind of query that displays its own dialog box prompting you for entering information before executing ?	Select Query	Crosstab Query	Parameter Query	Dialog Query	C
16	Which operator is used to filter and display rows when all (two or more) conditions are satisfied?	Range	In	All	And	C
17	The_____ button on the tool box display data from a related table	Sub form sub report	Relationships	Select objects	More controls	A
18	The command center of Access File that appears when we create or open the MS Access database File.	Database Window	Query Window	Design View Window	Switch Board	A
19	While creating relationship using mouse, how the the mouse pointer looks like?	A thick plus sign	A thin plus sign	An outlined rectangle	Arrow with Plus sign	C
20	The columns in a Microsoft access table are also called _____	Rows	Records	Fields	Columns	C
21	Which of the following is not a field type in Microsoft Access ?	Memo	Hyperlink	Ole Object	Lookup Wizard	D
22	Which feature is used to duplicate a control's formatting ?	Manager	Wizard	Painter	Control	C
23	Which of the following is not a type of relationship that can be applied in Access Database ?	One to many	one to one	many to many	All of the above	D
24	Which option allows us to build a new table by entering data directly into a table by entering data directly into a tabular grid ?	Datasheet View	Design View	Linked Table	Grid View	A
25	Which of the following shows the final result in a presentable way ?	Forms	Reports	Queries	Tables	B
26	A search value in SQL query can be a specific value or it can be	Logical Operator	Relationships	Wild Card Character	Comparison Operation	C

MS Access Theory Paper

27	How can we remove a relationship defined between two tables ?	From Edit Menu(by choosing delete relationship)	Select the relationship line and press delete	Choose delete option from relationship menu	Choose remove option from relationship menu	B
28	Queries in Ms Access can be used	To view data	As source for forms	As source for reports	All of the above	D
29	Microsoft Access is a kind of application .	RDBMS	OODBMS	ORDBMS	Network Database Model	A
30	Which of the following relation algebra operation do not required the participation table to be Union Compatible?	Union	Intersection	Difference	Join	D
31	Which of the following is not a property of trans junction?	Atomicity	Concurrency	Isolation	Duration	B
32	The three structures are used to stored data in	Network Model	Relational model	Hierarchical Model	File base system,	A
33	In Ms Access press Ctrl+O to	Open a new database	open an existing database	Exit Ms access	None of these	B
34	Query design window has two parts. The upper part shows	Name of fields ,field type and size	Tables with fields and relationships between tables	Criteria	Sorting Check Boxes	B
35	In a database table, the category of information is called	Tuple	Field	Record	All of the above	B
36	This key uniquely identifies each record	Primary Key	Key Record	Unique Key	Field Name	A
37	A database language concerned with the definition of the whole database structure and schema is	DCL	DML	DDL	All of the above	C
38	In table Design view what are the first column of buttons used for	Indicate Primary Key	Indicate current row	Both of above	None of these	C
39	Which of the following term is least related to database	Attributes	Tuples	Relationship	Columns	D
40	A Primary key in any table has the properties	Not null	No duplicates	Both of above	None of these	C
41	Every table in relational database contain a field or combination fields that can uniquely identify each records , it is called	Foreign Key	Native Key	Composite Key	Primary Key	D
42	An organized collection of logically related data is known as	Data	Meta data	Database	Information	C
43	The appropriate Data Type to sort time in access	Date/Time	Time only	Time	Time cannot be stored	A
44	Which of the following is use to get data from user	Query	Pages	Form	Report	C
45	Which controls lets a user create multiple pages in a form	Check box control	Combo box control	Option group control	Tab control	D
46	A(n).....is the default control for a Yes/No field	Check box control	Option button	toggle button	List box	A
47	Fordata to be useful ,both the sender and receiver need to able to read and use the data	Standardized	Fixed	Delimited	Shared	D
48	A(n) is dynamic mathematical calculation that displays a single value for a specific field	Format row	Criteria row	aggregate function	format layout	C
49	To remove all sorts in a table you can click thecommand	Clear All Sorts	Delete All Sorts	Eliminate All Sorts	Remove All Sorts	A
50	Database properties do Not include	Title	Author	Company	Size	D
